

Culligan. quench®

50/52

Under-Sink Filtration System

- Remove sediment, dirt and particles as small as 1 micron in size.
- Use activated carbon to remove chlorine, fine particles, off-tastes and odors.
- Include special phosphate and lead filters to remove hard water impurities and heavy metals.
- Feature an antimicrobial filter that uses silver ion technology to neutralize microorganisms.

Specifications

Filter measures 2.5" w x 12.5" h with the inlet/outlet ports
(2.5" w x 11" h without inlet)

NSF rated to 1,500 gallons and certified to NSF/ANSI 42 for
material safety, and for the reduction of chlorine, taste
and odor

Flow rate of 0.5 gallons per minute

No electrical connection required

8.5" gooseneck spigot (optional) for easy access and
container filling (52)

Replacement filters available at [QuenchWater.com](https://www.QuenchWater.com)

Product Details

The 50/52 is a perfect solution for situations where a ready supply of filtered water is needed, but space is too limited for a full-size filtered water cooler.

The 50/52 reduces contaminants commonly found in tap water:

- Asbestos fibers
- Chlorine taste
- Odor
- Dirt
- Lime scale sediment
- Turbidity
- Cryptosporidium
- Giardia cysts

Culligan Quench products are certified by independent authorized 3rd party laboratories in accordance of appropriate industry standards. To find out more about which certifications your product may have, please contact us.
