

Culligan Quench Case Study | Fitness Centers

Culligan Quench Provides Freshly Filtered Drinking Water for Non-Profit Family Physical Fitness Center

Culligan Quench replaces 5-gallon water jugs in gym saving valuable space and thousands of dollars annually.

The Challenge

- 5-gallon water dispensers and jugs were taking up too much of the fitness center's storage space.
- Facility management wanted to cut costs while still offering an unlimited supply of water to both staff and members.

The Solution

- Switched to a Culligan Quench bottleless water filter, immediately freeing up gym space.
- Providing unlimited filtered water on-demand makes meeting hydration needs in weight rooms and cardio areas seamless.

“Installation of Culligan Quench machines saved valuable space and cut cost, especially important for a nonprofit, in addition to ensuring proper hydration for the optimal workout.”

— Culligan Quench Water Expert

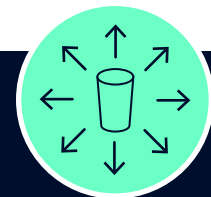

Results

1 Culligan Quench machine hydrates up to 50 members daily

Saved around 900 5-gallon jugs from entering landfills in the 6 years since switching

Saved \$3000 annually by switching to Culligan Quench

The Story

A local branch of a worldwide family fitness center faced the issue of 5-gallon water dispensers and jugs occupying valuable space within their facility. They wanted to find a solution that would not only cut costs but also provide an unlimited supply of water for both staff and members.

After reaching out to Culligan Quench, a local Culligan Quench water expert toured their facility to determine the best solution for the space and number of daily users. Through the consultative process, Culligan Quench recommended a bottleless water cooler to provide a virtually endless supply of freshly filtered drinking water on-demand. By eliminating the 5-gallon jug, this family fitness center branch was able to free up valuable storage space while alleviating worries of running out, no matter daily activities, events, or weather. Over the past six years since adopting Culligan Quench, the family fitness center has saved an impressive 900 5-gallon jugs from entering landfills.

With the implementation of Culligan Quench's water cooler, a single machine now efficiently hydrates 50 fitness center members daily! Moreover, the switch has resulted in an annual cost savings of \$3000 for the fitness, which as this family fitness center operates as a non-profit is an especially important benefit. By choosing Culligan Quench, the family fitness center successfully overcame their space and cost challenges while ensuring seamless access to filtered water for everyone in the facility.

Background

Proper hydration plays a vital role in optimizing performance and overall well-being during and after workouts. Elevate hydration levels at your gym or fitness center with a Culligan Quench machine. Beyond the benefit of refreshing hydration, choosing Culligan Quench also contributes to sustainability efforts by reducing reliance on carbon-emitting plastics such as single-use bottles and 5-gallon water jugs.

Culligan Quench offers a wide array of convenient and limitless hydration solutions, ensuring that gym-goers stay refreshed and motivated throughout their workout. With Culligan Quench, you not only enhance the gym experience but also take a step towards promoting a greener and more eco-friendly environment.
