

Culligan Quench Case Study | Higher Education

Northeastern Ivy League University's Men's Lacrosse Team Scores New Hydration Solution for Players and Staff

Culligan Quench replaces plastic water jug dispenser in Ivy league men's lacrosse team's locker.

The Challenge

- Lack of space in locker room led to unclean and inconvenient storage of 5-gallon water jugs.
- The team and coaches struggled to meet hydration demands after practices and games.

The Solution

- Switched to a bottleless filtered water cooler and instantly freed up valuable locker room space.
- Meeting hydration demands after practices and games is effortless with unlimited filtered water on-demand.

"I like how easy it is to use and the variety of equipment that is offered. It is much more economical than bottled water."

— Administrative Analyst, UCSF

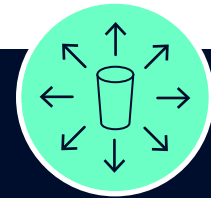

Results

One Culligan Quench machine hydrates up to 60 athletes and the coaching staff daily

Eliminated the need to store bulky and heavy water jugs in unnecessary spaces

Saved up to \$1,000 annually by switching one of this University's 42 sports teams to Culligan Quench

The Story

Lacrosse coaching staff and athletes from an Ivy league university located in New England were struggling to meet their hydration demands with weekly 5-gallon water jug deliveries, which could be around 8 – 10 a week. This high demand for water deliveries was made more apparent when the deliveries were often late and/or missing. Additionally, this university's sports facility houses multiple sports teams, making space in the locker rooms a premium. Without much room for storage, bulky water jugs were haphazardly stored throughout the locker room, hallways, and even in the bathroom, leading to the potential for off-the-field injuries.

Struggling to maintain locker room cleanliness with lack of water storage and to meet the hydration demands of the players, the Director of Men's Lacrosse Operations explored alternative water options, including Culligan Quench's bottleless filtered water coolers. The team decided to move forward with Culligan Quench because the attentiveness and quickness of our local water expert, as well as the familiarity Culligan Quench has of the surrounding area.

After a smooth and quick installation from a seasoned Culligan Quench service technician, coaches and players no longer worry about running out of water as they can now more easily hydrate on demand with filtered and great-tasting drinking water, letting them concentrate on performing their athletic best. Also, by installing a bottleless water cooler, this university's sports facility has freed up valuable storage space while eliminating fears of off-the-field injuries in the locker room.

Background

Education buildings and campuses are complicated places – lots of thirsty people, multiple buildings of varied sizes and purposes, and vocal sustainability movements. Culligan Quench offers a broad product line of water filtration systems, including drinking water coolers, ice machines, and flavored water dispensers to meet complex needs.

Culligan Quench has a dedicated customer service team standing behind every system we install. Our field technicians and customer care representatives are certified and knowledgeable about our equipment, filtration technologies, services, and problem resolution.
