Give Your Guests The Best

Premium Filtered Water Systems for Restaurants

A More Sustainable Future

Culligan quench®

Restaurants and bars play a significant role in global sustainability and can make a positive impact by removing single-use plastic and glass water bottles from their operations. Single-use bottles not only harm the environment but also contribute to the wasteful use of resources. By replacing single-use plastics with Culligan Quench filtered water systems and reusable glass bottles, restaurants can significantly reduce their plastic waste stream and demonstrate a commitment to sustainability.

Culligan Quench offers an array of innovative and operationally efficient filtered drinking water systems customized to meet the unique needs of your restaurant. Culligan Quench filtered water systems not only reduce plastic waste, but they also provide a more luxurious water experience for guests. Drinking water delivered in an aesthetically beautiful reusable glass bottle is a more elegant experience than serving from single-use plastics. Our reputation for providing the highest quality water has made Vero the water of choice for many Michelin starred restaurants across the country. Call us today and your Culligan Quench service representative will partner with you to create a customized water solution to save you significantly over bottled water delivery and reduce single-use plastic waste throughout your restaurant.

A survey by the National Restaurant Association found that 58% of adults said they were more likely to visit a restaurant that was environmentally friendly.

Vero Water®

Culligan Quench's premium Vero Water system uses a 5-stage proprietary purification process to create the exceptional taste of Vero Water. The quality and unparalleled level of concierge service, has propelled Vero Water into the most acclaimed hospitality venues, establishing it as the brand of choice of the most demanding and successful chefs, restaurateurs, and owner operators worldwide.

Culligan Quench's Extensive Product Range

Premium Water Dispensers

Vero Water is our dedicated premium hospitality brand. Culligan Quench offers an array of innovative and operationally efficient Vero systems customized to meet the unique needs of your restaurant. Our systems provide premium still and sparkling water utilizing your restaurant's own water source. Our advanced filtration enables clients to serve exceptionally great water on site and on-demand.

Vero Branded Reusable Bottles

Our beautifully branded glass bottles create an elegant and sustainable water experience. The Vero Signature bottle has been specially designed with break-resistant glass and a wide mouth to facilitate easy pouring and proper sanitation in commercial dishwashers. The Vero bottle enjoys wide consumer recognition and is served by celebrated chefs and awarded restaurants around the world.

Filtered Water Dispensers

Culligan Quench offers a broad selection of sophisticated, contemporary purified water dispensers in freestanding or countertop models that can be placed back-of-house to reduce shrinkage and hydrate your staff, chef, and crew with refreshing filtered water all day.

Ice Machines

Culligan Quench offers a variety of commercial ice machines that use the same advanced filtration and purification as our water coolers, to deliver the cleanest, best-tasting ice for your guests. We have range of dispensers to suit your ice production capacity needs from 95 lbs to 1,087 lbs daily.

The Premium Vero Water Experience

Vero Water® is the most profitable water brand you can offer. With Vero, your restaurant can provide your customers with high-quality, filtered still and sparkling water on-site, eliminating the need for ordering, storing, recycling, and disposing of single-use plastic water bottles. Restaurant staff can spend less time managing inventory and more time providing excellent customer service. Vero Water's beautiful bottle service can be a great time-saver for waitstaff at the table too, eliminating the constant need to fill individual water glasses by leaving extra servings for guests to serve themselves. By minimizing the need for frequent water refills, Vero water can help waitstaff provide an excellent dining experience.

In most restaurants bottled water is ordered by less than 20% of guests. Take advantage of Vero's unique per table pricing strategies to see water profits soar. For a fixed charge of \$2-\$4 per guest you can offer unlimited pours of still and sparkling Vero Water all meal long. This affordable up-sell opportunity will change your customers from drinking free tap water to happily paying for sustainably bottled.

**"My savings throughout the year are fantastic."
- Steven Haigh, KYU Restaurant, Miami, Florida**

High Quality Filtered Sparkling Water

The Vero Water system delivers supreme quality ice-cold sparkling water, which can be offered at a premium price point and create extra revenue behind the bar or at the table. Use Vero Sparkling water to make simple, low-cost, high-revenue sparkling beverages like cocktails, mocktails, detox water, and flavored sparkling recipes.

Filtered Ice Machines

Culligan Quench offers a variety of filtered ice machines to fit a range of capacity needs. Your restaurant will benefit from having one company for all of your hydration equipment, and our extensive service network to keep your ice and water flowing.

“There’s this refreshing palate cleansing feel to the product... it’s kind of unmatched.” – Chef Dale Talde, Goosefeather

Culligan quench

Specialty filter reduces bacteria, viruses and other large particles from the water supply.

Advanced carbon block filter reduces contaminants such as dirt, rust, and chlorine

An exceptional resin filter reduces dissolved solids and eliminates the harsh aftertaste of tap water.

A granular carbon filter both clarifies and balances the water, preparing it for its final polish.

Vero's custom taste polisher completes Vero's inspired taste to achieve a smooth, well-rounded finish.

Advanced Filtration

At Culligan Quench, we obsess over our taste. Our systems use the latest in filtration technology, with equipment designed specifically for high-flow beverage applications. Our five-stage filtration processes ensure that your restaurant delivers a consistently clean and refreshing taste. Your guest's dining experience does not have to be affected by poor local water quality. At Culligan Quench, we conduct over 260,000 water quality tests annually to tailor our advanced filtration and sanitization technologies to meet your specific water quality needs.

Turnkey Service

Culligan Quench is the premier water services company with more than 25 years of experience in installing and maintaining bottleless water dispensers and ice machines in over 120,000 businesses across North America. Every aspect of serving Vero Water is designed to be turnkey for our food service clients. Our highly-trained service technicians will deliver and install your water system, ensuring that it is running at optimal performance with minimal disruption to your daily operations. We offer worry-free maintenance and concierge service, including preventive maintenance, repairs, and filter changes, guaranteeing fresh and clean drinking water for your restaurant's guests.

Our national team of account managers and fully-insured service technicians go above and beyond to ensure that your water filtration system is working correctly. We offer comprehensive service with an average customer length of stay of 11 years, providing you with long-term assurance in your drinking water system.

Our service technicians are trained at Culligan Quench University, mastering the technology of each of our machines, and have access to all necessary tools to set up, install, and service your machine. We conduct annual inspections and filter changes to ensure the optimal performance of your water system. Our representatives are available from 8 am to 8 pm EST to answer your questions, troubleshoot problems, and guarantee that you and your guests never run out of clean, great-tasting drinking water. Partner with Culligan Quench for the best, most sustainable, water services for your restaurant or bar.

"We've been using Vero Water bottles in our restaurant for several years now and the response from our customers has been overwhelmingly positive. Not only do they appreciate the eco-friendly aspect of the program, but they also love the taste of the water. Implementing Vero Water was a no-brainer for us and we're thrilled with the results."
 - Jordan Rockensuess, Wild Thyme Restaurant Group
